## Dyno Basketball

**An 8' free standing inflatable goal.**

Play a full 360 degrees around the goal. Size of the field and the size of the ball is adaptable to the size you have and the age group playing. The 8' free standing goal is constructed of the same material as used in white water rafts, enabling them to be very rigid and stable. With the use of a standard cageball inflator you can inflate it in less than 15 minutes. And since it is inflatable it is extremely safe if a player runs into a support leg. The complete set includes one goal, one 40" ball, one 24" ball, four fillable ballasts and a set of instructions on how to play Dyno basketball. Other lighter balls such as playground balls or foam balls can be used for younger kids. The excitement this will bring to your classroom is unimaginable-like the product.
